Welcome Message

At Safi Demining Group (SDG), we are driven by a clear purpose: to create safer environments and support sustainable development through the responsible removal of explosive hazards. Our commitment to excellence, safety, and integrity guides every aspect of our operations. We take pride in delivering high-quality demining and explosive hazard management services that not only protect lives but also enable critical infrastructure, economic growth, and community resilience.

As we continue to grow, our focus remains on innovation, professionalism, and continuous improvement. We invest in the development of our people, the enhancement of our operational capabilities, and the adoption of international best practices to ensure reliable and effective service delivery. We value the trust of our partners and clients, and we remain dedicated to building long-term relationships based on transparency, performance, and shared success.

SDG is holding an ISO
9001:2015 Quality Management
System Certification

About the Company

Safi Demining Group (SDG) is a professional company specializing in humanitarian and commercial demining and explosive hazard management services. The organization is committed to delivering safe, efficient, and reliable solutions for the identification, clearance, and disposal of landmines and explosive remnants of war (ERW), enabling land to be safely used for development and community activities.

With a team of highly trained professionals and experienced technical experts, SDG operates in accordance with internationally recognized mine action standards and best practices. The company combines technical expertise, modern equipment, and strict safety protocols to ensure high-quality service delivery in complex and high-risk environments.

SDG works in close collaboration with government institutions, international organizations, and private sector partners to support infrastructure projects and development initiatives. Through its operations, the company contributes to reducing risks, protecting communities, and facilitating sustainable economic growth by restoring safe access to land.

Safi Demining Group (SDG) is duly registered with the Ministry of Industry and Commerce of Afghanistan under Registration No. (143990) and License No. (69380). The company is also registered with international identification systems, including DUNS No. 557737666, NCAGE Code SQJ07, and JCCS Vendor ID 67827.

Furthermore, SDG is accredited by the Mine Action Coordination Center of Afghanistan (MACCA), which serves as the National Mine Action Authority (NMAA), ensuring full compliance with both national and international mine action standards.

Vision & Mission

Vision

Our vision is to be a leading and trusted provider of demining and explosive hazard management services, recognized for excellence, safety, and professionalism. We aim to create safer environments for communities and development projects. We strive to restore land for productive use and sustainable growth. We are committed to continuous innovation and the adoption of international best practices. Our goal is to build long-term partnerships based on trust, performance, and humanitarian values.

Mission

MISSION

Our mission is to deliver safe, efficient, and reliable demining and explosive hazard management services. We are committed to protecting lives and communities from explosive threats. We aim to restore land for development and economic activities. We uphold the highest standards of safety, quality, and professionalism in all operations. We strive to support our partners through innovation, expertise, and sustainable solutions.

Core Values

Our core values are rooted in safety, integrity, and professionalism, guiding every aspect of our operations and decision-making. We deliver quality services with accountability, transparency, and strict adherence to international standards. We prioritize community well-being, continuous improvement, and building trusted partnerships through reliable performance.

Safety

We prioritize safety in all operations by strictly adhering to established procedures and international standards to protect our personnel, partners, and communities.

Integrity

We conduct our work with honesty, transparency, and accountability, building trust through ethical practices and responsible decision-making.

Professionalism

We maintain high levels of competence, discipline, and commitment, ensuring consistent delivery of reliable and effective services.

Quality

We are dedicated to achieving excellence by delivering accurate, efficient, and high-quality outcomes that meet recognized industry standards.

Teamwork

We foster a collaborative environment where mutual respect, coordination, and shared responsibility drive operational success.

Community Commitment

We are committed to protecting communities and supporting sustainable development by restoring safe access to land and reducing risks from explosive hazards.

Our Services

Safi Demining Group (SDG) provides comprehensive and professional mine action and explosive hazard management services designed to ensure safety and support development projects. Our services include non-technical and technical surveys, manual and mechanical mine clearance, Explosive Ordnance Disposal (EOD), and battlefield area clearance. We also offer site clearance and risk assessment services for infrastructure and construction projects, ensuring safe land access for implementation. All operations are conducted in accordance with international standards, with a strong focus on safety, quality, and operational efficiency.

Our Services

1- Non-Technical Survey (NTS):

SDG conducts comprehensive non-technical surveys to collect and analyze information on suspected hazardous areas. This includes community consultations, historical data review, and mapping to identify potential risks and plan safe clearance operations.

2- Technical Survey (TS):

Our technical survey teams verify suspected hazardous areas in the field to confirm contamination, determine the type and density of explosive hazards, and develop detailed clearance strategies.

3- Manual Mine Clearance:

Skilled deminers use specialized tools and protective equipment to safely detect, remove, and destroy landmines and unexploded ordnance, ensuring cleared areas are safe for use.

4- Mechanical Mine Clearance:

SDG employs mechanical equipment, including flails and armored vehicles, to efficiently clear large contaminated areas while maintaining strict safety protocols and operational precision.

5- Explosive Ordnance Disposal (EOD):

Our EOD specialists identify, neutralize, and safely dispose of unexploded ordnance such as bombs, grenades, and rockets, preventing accidental detonation and protecting communities.

6- Battlefield Area Clearance (BAC):

SDG clears former conflict zones and high-risk areas of all explosive hazards, enabling safe access for development projects, infrastructure, and community activities.

7- Infrastructure Project Clearance:

We provide site clearance, risk assessment, and hazard management for roads, pipelines, power lines, and construction projects, ensuring a safe environment for implementation and operations.

8- Advisory & Risk Assessment Services:

SDG offers professional guidance, hazard assessments, and operational planning support to partners and clients for safe project execution and effective mine action strategies.

Our Best Team

Safi Demining Group (SDG) is supported by a highly skilled and dedicated team of professionals with extensive experience in demining, explosive ordnance disposal, and mine action management. Our personnel includes qualified deminers, EOD specialists, technical surveyors, field supervisors, and operations managers, all trained to adhere to international safety standards and best practices. Each team member is committed to delivering safe, efficient, and high-quality services in complex and challenging environments.

The strength of SDG lies in its collaborative and professional work culture, where expertise, discipline, and continuous learning are prioritized. Through ongoing training, professional development, and strict quality control, our team maintains operational excellence while ensuring the safety of both personnel and communities. This cohesive and competent workforce enables SDG to successfully implement projects, meet client expectations, and uphold our reputation as a trusted partner in demining and explosive hazard management.

ZNCC & Safi Companies
Sub Contract Agreement for Unexploded Ordinance Clearance Activities

The Zwakman Nabzai Construction Company (ZNCC) intended to construct the new line bay at Nejrab substation as well as design and construction of additional towers to connect the line bay to the Nejrab substation. The boundary area need to be cleared from unexploded Ordinance (UXO's) according to USACE scope of work for this project.

This contract is made for the project having Code No (W912ER-13-C-0034), on (August 04, 2018) between Safi Demining Group (SDG) hereinafter referred as sub-contractor and Zwakman Nabzai Construction Company (ZNCC) hereinafter as prime contractor. The UXO clearance operations will start on subsequent to approval of DMAC tentatively on August 14, 2018 and ends on August 18, 2018.

Both parties are agreed on the following terms and conditions:

- According to this contract SDG is responsible to clear given tasks according to the organizational SOP's and ANMMS standards.
- The area has been located within the following coordinates:

	North	East		North	East
Point 1	3869143.775	551343.871	Point 2	3869073.949	551515.186
Point 3	3869065.407	551617.396	Point 4	3869110.336	551631.182
Point 5	3869127.809	551615.26	Point 6	3869104.415	551613.996
Point 7	3869107.698	551563.404	Point 8	3869129.504	551564.717

- According to the information provided by the client/contractor the sum of the intended area to be cleared from Unexploded Ordinance UXO's at the normal condition is (10,240.00) square meters.
- The entire corridor along the transmission line called Right-of-Way(25 meters) shall be surface swept, area for construction activities should be cleared up to the depth of (100)centimeters. And the boundary enclosed by the line bay should be cleared up as per specified coordinated mentioned above within the depth of (100) centimeters.
- SDG has the liability to insure against any accidents all its personal and equipment engaged in this project.
- SDG is responsible for conducting Internal Quality Control (IQC) and Quality Assurance (IOA) of its teams.
- External QA/QC will be conducted by MACCA/AMACC's staff and quality management department.
